DETAILED ACTION

Drawings

1. Figures 15-18 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicants admitted prior art (figure 16) in view of Kawana.

The device as claimed is substantially disclosed by applicants admitted prior art as shown in figures 15-18, but lacks the electric supply means being engaged by the image forming unit being moved in a widthwise direction of the intermediate transfer member. Kawana teaches using an electric supply means 207 that is engaged by a widthwise movement of the device 180 to engage the power means during sliding of the device into the apparatus (see figure 7).

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to move the electric supply connection means from the bottom of the image forming unit to the side of the device so as to be connected to the electric supply means by moving the image forming unit in a widthwise direction of the intermediate transfer member as taught by

Art Unit: 2859

Kawana to the power can be engaged by the normal movement of installing the image forming unit without an additional downward movement of the image forming unit.
